

HARSHIT SINGH

Melbourne, Victoria | 0434122001 | ausharshitsingh@gmail.com | Australian Citizen | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building and supporting production software across enterprise ERP, digital signage, audience analytics, APIs, integrations and data platforms. Experienced in C#/.NET, Rust, PHP, JavaScript, TypeScript and SQL, with practical exposure to multi-tenant systems, event-driven services and cloud storage integrations. Skilled in translating business requirements into maintainable solutions, diagnosing production issues, automated testing, CI/CD, deployment support and technical documentation. Strong focus on secure development, system reliability, engineering standards and collaborative Agile delivery.

CORE CAPABILITIES

Software Engineering: C# • .NET • ASP.NET • Rust • PHP • JavaScript • TypeScript • Deno • REST APIs • Asynchronous programming • Dependency injection • Unit, integration and end-to-end testing

Cloud & Integration: Azure Blob Storage • NATS JetStream • Event-driven architecture • Pub/sub messaging • Request-response patterns • Distributed services • JWT authentication • Secure integrations • Retry handling

Data: PostgreSQL • MySQL • SQLite • SQL • SQLx • Schema design • Tenant-scoped data access • ETL • SSIS • SSRS • Parquet • Data pipelines • Performance troubleshooting

DevOps & Reliability: CI/CD • GitHub Actions • Docker • Incus • Linux • Alpine Linux • Caddy • Deployment automation • Logging • Monitoring • Production support • Root-cause analysis

Delivery: Agile delivery • Backlog refinement • Sprint planning • Estimation • Code reviews • Release support • Stakeholder collaboration • Technical documentation • Engineering standards • Continuous improvement

PROFESSIONAL EXPERIENCE

Software Engineer & Technical Solutions Owner

onQ Digital Group | Melbourne | Sep 2024 – Present

- Develop and support production software for digital signage, content management, audience analytics and organisational data platforms, using Claude, GLM, Baseten, LLMs and Model Context Protocol (MCP) tools to support AI-assisted development.
- Maintain a multi-tenant PHP/MySQL CMS and Deno/TypeScript/Mithril frontend, building secure REST APIs, SQL workflows, integrations and scheduled processes.
- Develop asynchronous Rust services using Tokio and NATS JetStream for media encoding, authentication, data processing and distributed communication.
- Build cloud and data solutions using Azure Blob Storage, PostgreSQL, SQLite and Parquet, including onQOS and the IRLAB AI Camera Reader.
- Maintain automated testing, CI/CD, deployment documentation and production reliability across Docker, Incus, Alpine Linux and Caddy environments.

Enterprise Customer Service & Solutions Consultant

Endeavour Group | Remote | Sep 2023 – Jun 2026

- Supported customers and stakeholders across enterprise retail, account and operational platforms.
- Investigated complex incidents involving multiple applications, systems and business processes.
- Coordinated with technical and operational teams to resolve incidents and service requests.
- Translated technical findings into clear actions for customers and business stakeholders.
- Managed cases through Zendesk with accurate documentation, ownership and communication.

Campaign & Digital Solutions Developer

Flybuys | Melbourne | Nov 2023 – Apr 2024

- Developed customer-facing digital campaigns within a large retail loyalty platform.
- Translated campaign, segmentation and stakeholder requirements into technical solutions.
- Performed testing, quality assurance and release validation before production deployment.
- Investigated rendering, data and platform issues affecting customer experiences.
- Collaborated with marketing, product and technical teams to deliver platform improvements.

Web Developer

Expert Express | Melbourne | Mar 2022 – Oct 2023

- Developed and supported software for transport, fleet and logistics operations.
- Built frontend, backend, REST API and relational database functionality.
- Created dashboards and workflows for fleet activity and operational performance.
- Translated business requirements into maintainable software solutions.
- Investigated application, API and database issues while supporting testing and deployment.

Scrum Master

Corryong Neighbourhood Centre | Remote | Jul 2021 – Nov 2021

- Supported Agile delivery and coordinated team activities.
- Facilitated Scrum processes, tracked progress and helped remove delivery blockers.
- Supported communication and coordination between team members.

Software Engineer

MIND Infotech | Noida, India | Jun 2018 – Jun 2019

- Developed enterprise ERP applications using C#, .NET, JavaScript and SQL.
- Implemented backend functionality, business workflows and data-access components.
- Designed SQL queries, database objects and SSRS operational reports.
- Developed SSIS packages for ETL, data transformation and system integration.
- Tested software changes and resolved application, database and production issues.

Engineer Trainee

MIND Infotech | Noida, India | Jun 2017 – May 2018

- Supported C#/.NET application development, testing and troubleshooting.
- Worked with relational databases, enterprise applications and business workflows.
- Assisted with defect investigation and ongoing software maintenance.
- Participated in peer reviews and team-based development activities.
- Progressed to Software Engineer based on demonstrated technical capability.

EDUCATION

Master of Information Technology, RMIT University, Melbourne | 2019–2021, Completed with Distinction.

Bachelor of Technology – Computer Science and Engineering, Guru Gobind Singh Indraprastha University, Delhi, Completed with Distinction.
